

Kamlesh Kumar

Entry-Level Network Engineer | MCA Graduate

+91 6266314789 | kamleshsande85@yahoo.com | [Linkedin](#) | [GitHub](#)

Summary

Motivated MCA Graduate with CCNA-level hands-on training, aiming to start a career as a Network Engineer / NOC Engineer. Solid understanding of configuring and troubleshooting core L2/L3 networking concepts, including OSPF, EIGRP, VLANs, STP, HSRP, ACLs, and Port Security. Possesses foundational knowledge of network monitoring concepts (Wireshark, Syslog, SNMP) and a strong commitment to continuous learning and professional growth.

Education

- **Master of Computer Applications (MCA)** | Pt. Ravishankar Shukla University | **76.73%** (2023 – 2025)
 - **B.Sc. (Computer Science)** | T.C.L. Govt. P.G. College, Janjgir | **73.55%** (2021 – 2023)
-

Technical Skills

- **Routing (L3):** OSPF (Multi-Area), EIGRP, RIP v1/v2, Static Routing, Inter-VLAN Routing (SVI, Router-on-a-Stick).
 - **Switching (L2):** VLANs, 802.1Q Trunking, STP/RSTP/PVST+, EtherChannel (LACP/PAgP), PortFast, BPDU Guard.
 - **Security & Redundancy:** Standard/Extended ACLs, NAT/PAT, Port Security, DHCP Snooping, DAI, SSH, HSRP.
 - **Services & Monitoring:** DHCP, Syslog, SNMP, NTP, Wireshark, Ping/Traceroute, Extended Diagnostics.
 - **Tools & Automation:** Cisco Packet Tracer, GNS3, Python, REST APIs (Basic), JSON/YAML.
-

Projects & Practical Experience

- **Multi-Site Enterprise Network** [GitHub](#): Built a 3-site network (1500+ users) using Multi-Area OSPF, 802.1Q VLANs, SVIs, PAT, and Extended ACLs for secure inter-site routing.
 - **High-Availability Campus Network** [GitHub](#): Implemented HSRP for gateway redundancy and LACP EtherChannel to boost link bandwidth by 400% with STP optimizations.
 - **Secure Enterprise Network** [GitHub](#): Deployed defense-in-depth security featuring Port Security, DHCP Snooping, Dynamic ARP Inspection (DAI), and SSH v2 management.
 - **Network Automation Lab (Python)** [GitHub](#): Scripted automated SSH device configurations, config backups, and REST API parameter updates using Python and JSON data structures.
 - **NOC Monitoring Simulation** [GitHub](#): Set up centralized Syslog, SNMP, and NTP logging across 10+ devices; analyzed Wireshark traffic logs to identify network anomalies.
-

Work Experience

Executive – Help Desk | Perto India Pvt. Ltd., Jaipur

(Feb 2026 – June 2026)

- Managed end-to-end IT helpdesk tickets and user support via email & Call, ensuring accurate record-keeping and strict SLA compliance.
- Coordinated with field engineers to schedule service requests and streamline incident resolution workflows.

Desktop Support Engineer | Kaizen IT Services, Raipur

(Sep 2025 – Feb 2026)

- Performed daily examination, installation, and configuration of network infrastructure components (switches, VPNs, endpoints) as part of on-site support, troubleshooting software and hardware issues to improve ticket resolution by 20%.
 - Delivered Field Managed Services (FMS) under the Kyndryl Taxnet 2.0 project, supporting 100+ end-users and maintaining 99% IT uptime.
-
